## SUMMARY

---

Software Engineering (Co-op) student at the University of Guelph with experience in full-stack development, AI integration, and systems programming. Proven ability to build and deploy production-grade applications across web, backend, and AI systems. Strong foundation in Python, C, and SQL with hands-on experience in team-based and client-facing environments.

## EDUCATION

---

### University of Guelph

Guelph, Ontario

*Bachelor of Computing, Software Engineering (Co-op)*

*2024 – Present (Expected 2029)*

- **Relevant Courses:** Programming in C, Discrete Mathematics I, Object-Oriented Programming, Data Structures & Algorithms, Analysis & Design of Computer Algorithms, Software Systems Development & Integration, Structure & Application of Microcomputers

## EXPERIENCE

---

### Peace Services

Brampton, ON

*Web Developer Intern*

*May 2026 – Aug 2026*

- Built and deployed a production AI voice receptionist using Python and the Claude API to handle real inbound client calls, appointment intake, and FAQ — eliminating the need for a human receptionist
- Developed and maintained company websites using PHP, WordPress, and .NET, including SEO optimization to improve search visibility
- Conducted 70+ test calls to validate AI call routing logic, accuracy of responses, and multi-scenario handling before live deployment
- Configured automated outbound call notifications to clients using BiziBizi AI platform when orders or products were ready for pickup

### Steamoji

Mississauga, ON

*Coding Instructor*

*Oct 2025 – May 2026*

- Planned and delivered structured coding lessons to children, teaching core programming concepts through hands-on projects involving coding, logic, and 3D printing
- Documented student progress, learning outcomes, and project completion for internal tracking
- Adapted technical explanations to different skill levels; provided technical support by troubleshooting and maintaining student laptops

### Wize Computing Academy

Oakville, ON

*Lead STEAM & Robotics Instructor*

*2025 – Present*

- Led STEAM and robotics programming for youth summer camps, including Minecraft Coding and AR/VR sessions
- Developed beginner Python curricula and instructional materials for students with no prior programming experience
- Managed classroom logistics and mentored students through project-based learning experiences

## PROJECTS

---

### AI Receptionist (Ortho Care Services) | Python, BiziBizi, Claude API

- Developed a fully functional AI voice receptionist handling real patient calls for appointment booking, service inquiries, clinic hours, and FAQs — no human staff required
- Built a Python backend to manage business logic, retrieve clinic data, and communicate with the Claude API for accurate, consistent responses
- Designed multi-scenario call routing logic and configured automated outbound notifications for order pickups

## SKILLS & CERTIFICATIONS

---

**Languages:** Python, C, C#, Java, SQL, PHP, TypeScript, JavaScript, HTML, CSS, L<sup>A</sup>T<sub>E</sub>X

**Tools & Platforms:** Docker, Git, GitHub, GitLab, Linux, TinkerCAD, OnShape, Scratch, VEX

**Libraries & Frameworks:** Pandas, NumPy, Flutter, React, Next.js, Azure, .NET, Check

**Microsoft & Productivity:** Excel, SharePoint, Microsoft 365, Power BI, InfoPath, Microsoft Forms

**Certifications:** First Aid & CPR, AWS Cloud Practitioner Essentials, Google Cloud Skills Boost, Kaggle (Python), Kaggle (Intro to Machine Learning)
